

Client Instructions

Congratulations on receiving your first Biomagnetic Therapy session. Your body is beginning its healing process towards optimum health.

Biomagnetism is safe and natural with no side effects. However, on rare occasions some clients may experience a healing reaction when toxins and/or pathogens are dislodged and eliminated through the body's excretion pathways.

These pathways include the liver, kidneys, colon and skin and the process of detoxification may cause temporary headaches, fatigue, change in bowel movements, skin rashes or similar signs of cleansing and healing. Biomagnetic Therapy addresses the root causes of health issues and when the body truly heals, experiencing old symptoms and temporary discomforts are not uncommon.

To minimize the slight possibility of detoxification symptoms, we suggest you:

1. Change your toothbrush and sterilize your dentures or mouth guards
2. Drink plenty of pure water
3. Allow yourself plenty of rest

Any detoxification symptoms, although rare, usually pass in 24-48 hours. This is generally followed by a noticeable improvement in overall health.

Please Email or call us with any questions or feedback and to schedule your next appointment if you haven't already done so.
